Subject: Interim Status of 12/02/05 Minimum Requirements Decision Guide

To: The Files

The attached Minimum Requirements Decision Guide (MRDG), dated December 2, 2005, was prepared to document the agreement to seek public input regarding the State of Idaho's request for approval to use motorized equipment within the Frank Church River of No Return Wilderness. This version of the MRDG was prepared as an interim working document, primarily describing the State's request and substantiating the need to seek public input. Because it was prepared before public scoping occurred, it does not include the public input desired to inform a decision to approve or deny the State's request, and therefore is not complete. This MRDG is to be used as an internal, interim working document, and not final substantiation to be considered in my decision.

A final version of the MRDG will be available for public distribution once my decision is made.
